

Commonwealth of Pennsylvania
Governor's Office
Executive Order

WHEREAS, the citizens of the Commonwealth cannot receive accessible and affordable health care of the highest quality without sufficient adequately trained, compensated and employed health care staff to meet the full continuum of their health care needs.

WHEREAS, the Commonwealth is facing a serious shortage of health care workforce adequate to provide physical, behavioral, primary, oral, acute and long-term care needed by its residents now and in the future, and this shortage has only been exacerbated by the pandemic.

WHEREAS, the Commonwealth's economy is known for its "Eds and Meds" but too many of those trained in health care in Pennsylvania's schools and universities do not remain in Pennsylvania, and those who have worked here are leaving their jobs, despite the need for them, due to licensure, compensation and other barriers to their entering or remaining in the State's health care workforce.

WHEREAS, the Commonwealth agencies responsible for licensing, establishing training requirements, regulating health care, and providing funding have, over time, been delegated overlapping responsibilities and have not worked cohesively to assure an adequate health care workforce.

WHEREAS, it is the responsibility of the Commonwealth to determine how best to eliminate employment barriers such as non-optimum licensure and regulation and compensation issues

that impede the adequacy of the State's health care work force now and in the future.

WHEREAS, the establishment of an Office of Health Care Workforce Innovation and Reform and the establishment of the Governor's Health Care Workforce Reform Cabinet will coordinate and implement the Commonwealth's Health Care Workforce Innovation and Reform Agenda.
